SKILLS

- Go, Rust, Python, TypeScript
- Kubernetes, Docker, Terraform
- AWS, GCP, PostgreSQL, Redis
- gRPC, Kafka, GraphQL
- Linux, eBPF, performance profiling

EDUCATION

Springfield State University

B.S. Computer Science, 2017

GPA: 3.7 · Dean's List 2015–2017

AWARDS

- Globex Engineering Excellence, 2021
- Acme Innovation Prize, 2023

EXPERIENCE

Acme Corp — Senior Software Engineer

Jan 2022 – Present · Springfield, IL

- Led migration of three core microservices to Kubernetes, cutting p99 latency by 42% and infrastructure cost by 28%.
- Designed multi-tenant rate limiter handling 90M requests/day with sub millisecond overhead.
- Mentored four junior engineers to mid-level promotion over 18 months
- Owned the cross-service authentication library used by 22 internal teams.

Globex Corporation — Software Engineer

Mar 2019 – Dec 2021 · Remote

- Built an event-driven data pipeline processing 12 TB/day across 35 internal services.
- Reduced deploy time from 28 to 6 minutes via parallel CI and Docker layer caching.
- Cut Sev-2 MTTR from 90 minutes to 35 minutes by owning the on-call runbook.

Initech — Junior Engineer

Aug 2017 – Feb 2019 · Pacific Coast, CA

- Implemented authentication and session management for a 200-user admin tool.
- Migrated legacy monolith routes to a Node.js service, cutting average response time by 55%.

PROJECTS

opentrace — Distributed Tracing Library

Open source, 2200+ GitHub stars

- Lightweight tracing SDK for Go services with built-in OpenTelemetry export.
- Adopted by six startups for production observability.
