SUMMARY

Product-minded software engineer with eight years building reliable data platforms and developer tooling. Comfortable owning a service end to end, from schema design through on-call. Equally happy mentoring juniors and untangling a gnarly production incident at 2am.

EXPERIENCE

Northwind Labs

Jan 2021 - Present

Senior Software Engineer

- Led migration of the ingestion pipeline to a streaming architecture, cutting end-to-end latency by 40% across 12 downstream consumers.
- Designed and shipped a self-serve schema registry adopted by 30+ internal teams within two quarters.
- Mentored four engineers through their first on-call rotations and authored the team's incident-response runbook.

Brightwater Systems

Jun 2017 - Dec 2020

Software Engineer

- Built a billing reconciliation service processing 2M transactions daily with 99.98% accuracy.
- Reduced p99 API latency from 800ms to 120ms by introducing read-through caching and query batching.
