

Jordan Avery

Columbus, Ohio | (614) 555-0137 | jordan.avery@example.com | linkedin.com/in/jordan-avery

SUMMARY

Computer science student with internship experience across front-end development and data services, seeking a full-time software engineering role. Comfortable moving between UI work, code review, and data quality tooling in Python. Experienced presenting demos to stakeholders and writing documentation that other interns could follow without help. Interested in developer tooling, data platforms, and design systems.

WORK EXPERIENCE

Platform Engineering Intern, Northwind Technology. San Jose, California

May. 2023 - Aug. 2023

- Participated in debugging and troubleshooting front-end issues, ensuring timely resolution.
- Conducted code reviews and implemented improvements based on feedback to enhance code quality.
- Worked closely with senior developers to ensure alignment of front-end and back-end functionality.
- Created UI designs for a website supporting a newly acquired product line.

Data Services Intern, Brightex. Dayton, Ohio

May. 2020 - Aug. 2020

- Reduced the PostgreSQL database data loading steps by 20%.
- Created a master validation script using Python to check for missing and duplicate values.
- Created graphs to summarize program data using different Python libraries.
- Tested and debugged various educational software builds.

EDUCATION

Ohio Valley State University

Bachelor of Science in Computer Science

Aug. 2021 - May. 2025 · Columbus, Ohio · GPA: 3.7 / 4.0

Relevant Coursework: Data Structures, Algorithms, Databases, Operating Systems, Software Engineering, Web Development, Statistics

Honors: Dean's List (four semesters), ACM chapter member

Activities: Hackathon club officer, peer tutoring for intro courses

PROJECTS

Campus Marketplace Web App

- Built a React and Node.js marketplace for students to trade used textbooks.
- Deployed on a containerized stack with automated database backups.
- Wrote integration tests covering checkout, listings, and messaging flows.

Intramural Stats Dashboard

- Charted weekly league statistics with a small Flask and Chart.js stack.
- Automated roster imports from CSV exports shared by team captains.
- Published a season recap page viewed by two hundred students.

SKILLS

- Python (pandas, NumPy, pytest)
- JavaScript and TypeScript
- React with Redux Toolkit
- Node.js and Express services
- PostgreSQL schema design
- Git, GitHub pull-request flow
- Docker container workflows
- HTML, CSS, responsive layout
- Figma wireframes and mockups
- Agile and Scrum ceremonies
- REST API design and testing
- CI pipelines (GitHub Actions)
- Linux shell and scripting basics
- Jira and Confluence workflows
- Unit testing with Vitest and Jest
- Express middleware patterns
- SQL query tuning fundamentals
- Accessibility (WCAG) awareness
- Chrome DevTools profiling
- Notion documentation habits
- Postman collection testing
- Vite build configuration
- Redux state normalization
- OAuth login integrations
