SUMMARY

Senior software engineer with eight years building reliable backend systems and platform tooling. Strong record of cross-team delivery, mentoring junior engineers, and shipping measurable infrastructure improvements at high-traffic startups.

EXPERIENCE

Acme Corp Jan 2022 – Present

Senior Software Engineer · Springfield, IL

- Led migration of three core microservices to Kubernetes, reducing p99 latency by 42% and cutting infrastructure cost by 28%.
- Designed and shipped a multi-tenant rate limiter handling 90 million requests per day with sub-millisecond overhead.
- Mentored four junior engineers through promotion to mid-level over 18 months.

Globex Corporation Mar 2019 – Dec 2021

Software Engineer · Remote

- Built an event-driven data pipeline processing 12 TB per day across 35 internal services.
- Reduced deploy time from 28 minutes to 6 minutes by parallelising CI test suites and caching Docker layers.
- Owned the on-call rotation rotation runbook, cutting Sev-2 mean-time-to-resolve from 90 minutes to 35 minutes.

Initech Aug 2017 – Feb 2019

Software Engineer Intern → Junior Engineer · Pacific Coast, CA

- Implemented authentication and session management for an internal admin tool used by 200 employees.
- Migrated legacy monolith routes to a Node.js service, cutting average response time by 55%.
