EDUCATION

Lakeside Institute of Technology

Seattle, WA

B.S. in Computer Science

Sep. 2024 – Jun. 2027

- Incoming Courses: Deep Learning, Machine Learning, Natural Language Processing, Intro to Quantum Computation, Intro to Operating Systems, Intro to Compiler Construction, Intro to Artificial Intelligence

Northgate State University

Hoboken, NJ

B.S. in Computer Science

Sep. 2022 – May 2024

- Relevant Coursework: Data Structures, Algorithms, Systems Programming, Computer Architecture, Statistics

EXPERIENCE

Northwind Labs

Bellevue, WA

Software Engineering Intern on the Machine Learning Team

Sep. 2025 – Apr. 2026

- Trained gradient-boosted fraud classifiers on an internal ML platform, engineering features from transaction velocity and chargeback patterns to identify abuse across the merchant network
- Built a streaming feature pipeline using Apache Flink and an internal feature store to compute merchant risk signals from raw payment events, reducing p99 scoring latency by 87% from 800ms to sub-100ms at checkout
- Reduced model false positive rate by 18% by incorporating new behavioral signals from device fingerprinting and IP geolocation into retraining pipelines, saving the operations team an estimated 200+ reviews per week
- Developed model monitoring services deployed on Kubernetes to track prediction drift and alerting thresholds across 5 production classifiers processing over 10 million daily transactions

Beacon Financial

McLean, VA

Software Engineering Intern

Jun. 2024 – Aug. 2024

- Built an automated solution that shut down after-hours cloud instances and a web application for on-demand reactivation, reducing cloud spending to 41% of previous levels
- Optimized internal development testing by creating new automation scripts, reducing testing time by 64%
- Developed an editor extension surfacing AI-assistant usage insights using TypeScript, Node.js, and a REST API
- Integrated OAuth SSO for seamless user authentication, reducing onboarding time by 90%

Greenfield Studios

New York, NY

Software Engineering Intern

May 2023 – Jun. 2023

- Developed a personal legal document PDF generator using a large language model API, Flask, and AWS
- Deployed CloudFormation templates for test instance lifecycles leading to a 31% reduction in resource use
- Designed and implemented a caching layer using Redis, reducing database query response time by 50%

Meridian Analytics

New York, NY

Software Engineering Intern

Jun. 2023 – Aug. 2023

- Automated product URL collection for model training using Python (Scrapy) to webscrape ecommerce sites
- Grew the customer base by 7% after building Selenium tools that analyzed engagement with Pandas and Matplotlib

PROJECTS

tinylm | [Link](#)

Jan. 2026

- Built a GPT-style language model from scratch in PyTorch with multi-head attention, KV cache, and generation

bytetoken | [Link](#)

Feb. 2026

- Built a byte-pair encoding tokenizer with regex pre-tokenization, validated compression against a reference library

Finance4Dummies (Hackathon Winner) | [Link](#)

May 2023

- Won 1st place for Best Financial Hack at a regional collegiate hackathon

TECHNICAL SKILLS

Languages: Python, Go, C, C++, Java, JavaScript, Swift, PHP, HTML, CSS

Technologies: Linux, Unix, Amazon Web Services, Microsoft Azure, Postman, Docker, Raspberry Pi, iOS

Interests: Science Fiction Novels, Weightlifting, Operating Systems, Gardening, Tennis, Basketball, Math
