

Jordan Avery

Software Engineering Leader

(408) 555-0145 jordan.avery@example.com Santa Clara, CA

SUMMARY

A seasoned engineering leader with experience managing large cross-functional, cross-site teams to deliver scalable products. Proficiently balances technical contributions and managerial responsibilities. A dedicated advocate of agile methodologies, committed to elevating efficiency and quality.

EXPERIENCE

Sr. Engineering Manager (L7)

Alphabet / Google Fiber - Customer Experience Engineering

04/2021 - Present Mountain View, CA

Manage user-facing sign-up and post-signup applications across web, mobile web, Android, and iOS for Google Fiber customers.

- Built a 50-member team across three global sites (US, SG, PL).
- Enhanced Android Play Store rating from 1.9 to 3.8.
- Successfully introduced a redesigned UI across web and mobile platforms.
- Launch of a new cross-functional widgetized architecture to remove business logic duplication with ~10% improvement to CSAT.

Sr. Engineering Manager (L6 / L7)

Google Assistant, Assistant on Android TV

06/2017 - 04/2021 Mountain View, CA

Managed a significantly successful team for Assistant on Android TV.

- 2.2M Assistant DAUs and 17.2M MAUs.
- Launched reimagined Assistant experience for Google TVs.
- Improved yield by 44%.
- Re-architected to move to a new underlying assistant engine.
- Launched industry-first Android TV with hotword-based trigger.
- Improved cold-start latency by 18x, and warm-start by 6x.

IC, Technical Lead, TLM (L4 / L5 / L6)

Google Cloud Networking, Google Play Books, Accessibility

11/2006 - 04/2017 Mountain View, CA

Worked as an individual contributor and technical lead across various teams.

- Managed a team of 5 to work on Control Plane for Hybrid Cloud APIs.
- Extracted and improved data sets to launch book series feature, leading to improved recommendations to users.
- Collaborated to re-architect and build an internal feedback tool.
- Improved email accessibility by adding screen-reader compatibility and high-contrast themes.

Sr Software Engineer

America Online / Netscape

07/2004 - 11/2006 Mountain View, CA

Boxely UI Framework, AOL Webmail.

- Architected and implemented accessibility support for the Boxely UI framework built using non-native Windows components.
- Coordinated with screen reader (AT) vendors to get compatibility.

STRENGTHS

Leadership

Led diverse teams across global sites, promoting cross-team collaboration. Mentored engineers and managers to achieve career goals. Utilized data-driven models to enhance developer performance and boost team productivity.

Innovation and Entrepreneurship

Filed and received a Patent (GP-20451-00-US). Successfully launched and sold a consumer website LaunchPadCart.com.

SKILLS

Highly Scalable Consumer Apps
Mobile Development Web Android
iOS Cross-PA Cross-team Collab
Mentoring Coaching A/B Testing
User Growth Java C++
Javascript / Typescript Python PHP

ACHIEVEMENTS

Improved Yield

Measured and improved yield rates by 44% for Assistant usage on Android TVs.

Assistant on Google TV

Successfully launched Assistant support on this popular Chromecast w/ Google TV device.
