

Jamie Rivera

Software Engineering Leader

(512) 555-0142 jamie.rivera@example.com Austin, TX

SUMMARY

Engineering leader with experience managing large cross-functional, cross-site teams to deliver scalable products. Balances technical contribution with managerial responsibility. Advocate of agile methodologies, focused on efficiency and quality.

EXPERIENCE

Sr. Engineering Manager

Northwind Systems - Customer Experience Engineering
04/2021 - Present Austin, TX

Manage user-facing sign-up and post-signup applications across web, mobile web, Android, and iOS.

- Built a 50-member team across three global sites (US, SG, PL).
- Raised Android Play Store rating from 1.9 to 3.8.
- Introduced a redesigned UI across web and mobile platforms.
- Launched a widgetized architecture removing logic duplication, ~10% CSAT lift.

Sr. Engineering Manager

Globex Assistant, Assistant on Living-Room TV
06/2017 - 04/2021 Austin, TX

Managed a successful team for the TV assistant surface.

- 2.2M daily and 17.2M monthly active users.
- Launched a reimagined assistant experience for living-room TVs.
- Improved yield by 44%.
- Re-architected onto a new underlying assistant engine.
- Shipped industry-first hotword-based trigger on the platform.
- Improved cold-start latency by 18x and warm-start by 6x.

IC, Technical Lead, TLM

Cloud Networking, Books, Accessibility
11/2006 - 04/2017 Austin, TX

Individual contributor and technical lead across teams.

- Led a team of 5 on the control plane for hybrid cloud APIs.
- Improved data sets to launch a book-series feature, lifting recommendations.
- Re-architected and built the internal feedback tool.
- Added screen-reader compatibility and high-contrast themes to webmail.

Sr Software Engineer

Initech / Vandelay
07/2004 - 11/2006 Austin, TX

UI framework and webmail accessibility.

- Architected accessibility support for a non-native UI framework.
- Coordinated with assistive-tech vendors for compatibility.
- Added high-contrast, keyboard, and screen-reader support.
- Ran accessibility education for engineering members.

Vendor Consultant

Contoso
06/2003 - 03/2004 Redmond, WA

- Built a new soft keyboard for next-gen tablet devices.
- Rewritten ground-up using C#/.Net, GDI+, XML.
- Designed the interaction layer handling keystroke send/receive.
- Added support for platform accessibility APIs.

Self Employed

Fabrikam Languages

STRENGTHS

Leadership

Led diverse teams across global sites, promoting cross-team collaboration. Mentored engineers and managers toward career goals. Used data-driven models to boost team productivity.

Innovation and Entrepreneurship

Filed and received a patent (US-0000000). Launched and sold a consumer website.

SKILLS

- Highly Scalable Consumer Apps
- Mobile Development Web
- Android iOS Cross-PA
- Cross-team Collab Mentoring
- Coaching A/B Testing
- User Growth Java C++
- JavaScript/TypeScript Python
- PHP

ACHIEVEMENTS

Improved Yield

Measured and improved yield rates by 44% for assistant usage on TVs.

Assistant on Living-Room TV

Launched assistant support on a popular streaming device.

FOCUS AREAS

Interviewing

Over 200+ interviews for engineering, product, and other roles.

Roadmaps & Presentations

Prepared quarterly roadmaps. Presented at engineering conferences, summits, and leadership meetings.

Mentoring

Coach and mentor engineers and engineering managers across levels.

20% Projects

Collaborated with external non-profits to launch 10 new web fonts, laying a foundation for broader language coverage.

12/2000 - 05/2003 Cupertino, CA

- Built a transliteration keyboard using keyboard hooks.
- Made it extensible via a keymap editor.
- Built a companion website and guided installer.

Vendor Consultant

Umbrella ICN

04/1995 - 12/2000 Santa Clara, CA

- Built a drag & drop interface for moving hardware boards.
- Built Java APIs for CRUD operations with XML responses.

EDUCATION

B.S. in Computer Science

State University

Graduated 1995
